Hubworks
is your game changer

THE PLATFORM / **HUBWORKS**

Get integrations done in days
not weeks.

Integrations between
background screening providers
and applicant tracking systems
are our specialty.

By translating the formats and
protocols of the individual
providers into a standard
format, Hubworks makes the
integration of your platform
seamlessly possible, painless,
and cost-effective.

Benefits of Applicant Tracking Systems

High Availability

Because deverus' integration engine is based on the AWS Cloud, you can expect scalability and availability when you need it. AWS is backed by the power and security of Amazon, providing the highest caliber in security and performance.

Logged and Loaded

deverus' dependency-free logs are more than just a series of records. Instead, you gain access to a robust logging application to find and fix errors on the spot, reprocess problematic messages, select what information is logged, and much more!

Connect to Anything

deverus supports a wide number of transfer protocols to ensure you can connect to any system (LLP, HTTP/HTTPS, FTP/FTPS/SFTP, Web Services (SOAP, RESTful), Database, File system, TCP/IP, etc.).

High Standards

We use HR open standards to simplify the development process, allowing other systems to integrate easily with the deverus platform.

Features

Improve Workflow

When you use an integrated information provider, requests will go straight to the providers along with any status updates, request for more information, notes, etc. You'll also see the results delivered right into your platform. And based on your custom quality assurance settings, those results can go to QA or directly to your clients.

Reduce Return Time

The best thing about using an integrated information providers is the return time. It's faster, much faster. Once the order is entered it goes straight to the providers and depending on the search type, sometimes is returned in minutes, not hours. Automation and integration means faster return times.

Improve Accuracy

With less people touching requests and results, you can count on improved accuracy. There's just less room for human error. What's more these information providers are trained to do what they do best--get the right information fast. This allows you to focus more on sales and administration instead of entering requests or results.

Features

Project Coordinator

Our Hubworks project coordinator's job is to act as a liaison between you and the ATS. They gather requirements, set expectations, and make sure all projects for connection are implemented on time without any hassle for you.

In Depth Online Resources

Our support portal is full of online resources, videos, a robust knowledge base and tutorials built to guide you step by step through using your system and troubleshooting issues. But we don't rest on just online support, we also have the best people in place ready to answer your questions by phone, chat, email or ticket system.

24/7 Support

Our expertly trained support team is ready to answer your questions and solve your problems 24/7 via our ticket system. Historically, during office hours, we answer all calls well under two minutes, and nearly 90% of issues are resolved on the first call.
